**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 15, 16, 28, and 29, drawn to master scheduler for creating a schedule of events with which to drive a media server, classified in class 725, subclass 116.
  - II. Claims 19-27, drawn to synchronizing and propagating changes to an event using automated scripts which are executed in response to said changes, classified in class 725, subclass 37.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as an automatic response mechanism to changes in a personal playlist. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. A telephone call was made to the law office of Brown, Raysman, Millstein, Felder, and Steiner on September 30, 2004 to request an oral election to the above

restriction requirement, but did not result in an election being made, as the attorney of record, Katrine A. Levine (Reg. # 41,941), could not be located.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
